

## How it works is simple.

Individuals, families and organizations rely on each other for their medical needs.

**Members give a monthly contribution.**

**Contributions are placed in an escrow account.**

**Escrow Account for Sharing Medical Needs**  
A small amount is set aside for daily operations.

**Eligible medical needs are processed for sharing.**

**We send funds directly to the provider to pay medical bills.**

**Transparency is key.**

**Our members' trust is important, so we remain open about how we make decisions and answer any questions about how we operate.**
